

SIDDHARTH JANI

Regulatory Affairs | EU/UK Labelling & Lifecycle Management

+91 9512323133 | siddharth.jani.56@gmail.com | Ahmedabad, Gujarat, India | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Results-driven Regulatory Affairs professional with a strong foundation in both Regulatory and Quality Assurance domains. Currently at Intas Pharmaceuticals (Accord Healthcare), managing EU/UK labelling, artwork, and lifecycle submissions. Experienced in CTD/ACTD dossier compilation, post-approval activities, cGMP compliance, and QA documentation. Certified in Global Regulatory Affairs, Biologics, and Medical Devices. Proficient in regulatory platforms including Karomi, Qedge, ADP, RIMS, TVT, and GS1. Committed to ensuring compliant, timely submissions and supporting successful product launches across European markets.

CORE COMPETENCIES

EU/UK Regulatory Affairs | Labelling & Artwork Management | SmPC/PIL/Label Preparation | cGMP Compliance | QA Documentation | Post-Approval Changes | Gap Analysis & Compliance

Regulatory Tools: Karomi | Qedge | ADP | RIMS | TVT

WORK EXPERIENCE

Executive – Regulatory Affairs | **Intas Pharmaceuticals (Accord Healthcare)** | Oct 2024 – Present

- Facilitate cross-functional collaboration between EMENA teams, CMOs, packaging development, logistics, marketing, QA, and manufacturing to ensure alignment and efficiency in regulatory workflows.
- Lead New Product Launch (NPL) coordination by tracking MA and artwork readiness, ensuring on-time submissions and approvals aligned with commercial timelines.
- Monitor and implement MHRA guidance updates and post-Brexit UK national procedures, including PL and PLGB licensing pathways; support renewals and variations following MRP/DCP approvals.
- Prepare Product Information documents (SmPC, PIL, Labels) and manage harmonization across CMS countries.
- Review and submit quality-related variations covering API, excipient, analytical, and manufacturing process updates.
- Prepare variation submissions, Article 61(3) documents, and change requests ensuring compliant formatting for all submission components.
- Conduct periodic gap analyses based on national updates from EU/UK markets to maintain labelling compliance; resolve QP queries related to artworks.
- Prepare and submit Type IA, IB, and II variations for multiple products across diverse markets.
- Proficiently use regulatory platforms: Karomi (Artwork Management), Qedge, ADP, RIMS, TVT, and GS1 for barcode generation and artwork verification.
- Drive process optimization initiatives in artwork review cycles for improved stakeholder coordination and communication efficiency.
- Work across multiple dosage forms including oral solids, injectables, topicals, and biosimilars.

Regulatory Affairs Officer | **Regtech India Solutions** | Mar 2024 – Oct 2024

- Prepared and reviewed regulatory dossiers in accordance with CTD/ACTD and country-specific guidelines for international markets.
- Managed post-approval changes including CBE0, CBE30, and PAS filings with relevant regulatory authorities.
- Compiled and submitted annual reports, PSUR/PADER submissions, and created SPL documentation.
- Prepared and reviewed technical documents including Specifications, BMR, MFR, and Validation Reports.

QA Officer | Amneal Pharmaceuticals (SEZ – Matoda) | May 2023 – Mar 2024

- Performed machine and area clearance during dispensing, manufacturing, and packaging operations ensuring cGMP compliance.
- Conducted sampling of blend, finished product, reserve, stability, hold time, and in-process samples; managed sampling aids.
- Carried out in-process checks, AQL and ANSI sampling per BMR, BPR, SOPs, and GxP documents.
- Reviewed and approved packaging artworks, proofs, and shade cards; ensured appropriate labelling during manufacturing and packaging.
- Initiated change controls, planned and unplanned deviations; reviewed environmental monitoring and calibration records.
- Reviewed and approved Quality Notifications (Change Controls, Deviations) during batch manufacturing and packaging.
- Archived executed documents including BMR, BPR, and Hold Time Protocols; monitored label control room environmental conditions.
